

| Deduction | Description   |
|-----------|---|
| 0,25      | Unsupported statement   |
| 0,35      | Methodology: Metrics aggregation. The mean is used with no discussion of  |
| 0,5       | No statistical analysis   |
| 0,15      | Text of a software evolution law literally taken from elsewhere and not   |
| 0,5       | Discussion of the related work should have been more elaborate (more papers should have been considered).             |
| 0,35      | Methodology: GQM: Questions not stated  |
| 0,3       | Methodology: GQM: Questions are too high-level  |
| 0,35      | Statistical analysis could have been improved: think, e.g., about fitting linear models and checking goodness of fit. |
| 0,25      | Conclusion missing: have you found enough evidence to claim that the law holds for the case study you have chosen?    |
| 1         | Discussion of related work is too short   |
| 0,35      | Wrong statement   |
